### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: prior art does not teach or fairly suggest, in an apparatus with first and second mold halves, each mold half having first and second cavities, the limitations of a first pinch bar attached to the first cavity of the first mold half, a first pinch bar attached to the second cavity of the first mold half, a second pinch bar attached to the first cavity of the second mold half, and a second pinch bar attached to the second mold cavity of the second mold half, where each pinch bar has a surface and a protrusion extending from the surface, and where the pinch bars are positioned such that the protrusion of the first pinch bar and the protrusion of the second pinch bar of the first mold cavity are positioned for pinching a parison when the first and second mold halves close, and likewise the protrusion of the first pinch bar and the protrusion of the second pinch bar of the second mold cavity are positioned for pinching a parison when the first and second mold halves close. Prior art includes Avery (US Patent 3,936,263) which teaches pinching a parison between mold lands (142). Avery does not teach that the mold lands have pinch bars and, absent hindsight, there would be no reason to modify the mold lands to have first and second pinch bars attached thereto, at both the top and bottom of the mold.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
